

# HARP-2 Newsletter

December 2013

## CONGRATULATIONS

**JUST 58 LEFT TO RECRUIT!!**

## Recruitment:

**482 recruited to date!**

### WHAT A YEAR FOR HARP-2 RECRUITMENT

The HARP-2 team would like to give a big thank you to everyone at site, currently we have recruited **482** patients with only **58** patients left to recruit. It is only with all your hard work and continued support that 2013 has been such a successful year for recruitment. Now as we head into 2014 and start the final push towards our recruitment target can we ask for an extra special effort at site to recruit HARP-2 patients. Please remember that we are here to help if you have any questions at all.

### Helpful HARP-2 Points!

#### CRF Stock levels

As we are coming to the end of recruitment for the HARP-2 study, we are currently reviewing our spreadsheet of CRF stock levels at site and we would like to notify you that we will be contacting sites in due course to confirm if our records match the number of CRF's currently at site. Therefore can we ask that you complete a search for all HARP-2 CRF packs with you so that we can ensure our records match the number of CRF packs at site.

### Sample Boxes

John Conlon has ensured that all sites currently have adequate Research Sample Boxes and DNA PAXgene tubes for the Christmas period but if for any reason sites require further supplies please contact the CTU office immediately on 028 90638173
