REST Newsletter

Edition 5

Welcome to a special edition of the REST Newsletter!

Thank you very much for your continued hard work and support with the REST study! We are delighted to launch the REST eLearning programme & study app!

About the eLearning programme and study app

We have produced e-learning modules to help with disseminating knowledge of the REST trial to staff in your units.

There are two platforms:

1. eLearning programme
2. Study app

1. eLearning programme:

- Can be found at:
<http://rest.learnprouk.com/>
- There are two modules: one clinical and the other mainly research focused
- The clinical module is aimed at all medical, nursing and additional staff in your unit who may be involved in looking after REST patients
- The research module is mainly aimed at research staff but may be completed by any interested staff members

2. Study app:

- On your device (smartphone, tablet etc) the app can be found in the app store by searching for "learnPro"
- You can then download the app to your device
- On the app you will find helpful information such as eligibility criteria, reference tables and adverse event reporting guidance

Create an account

Create an account to access the REST eLearning programme using the link below:

<http://rest.learnprouk.com/>

Technical issues

If you have any problems regarding access to the modules or the app, please get in contact with learnPro directly:

Email: support@learnpro.co.uk

Feedback

If you have any feedback or comments on the eLearning programme or study app please email:

REST@nictu.hscni.net
